# SK series high pressure multi-stage pumps

## Performances

- Heads of up to 200m
- Flow rates of up to 300m³/h.

## Applications

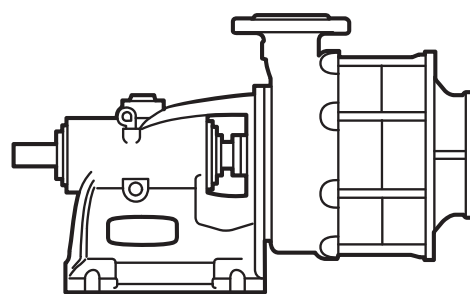

- Agriculture / irrigation
- River water extraction / water supply
- DWAF / general industry.

## Features

- Replaceable neck rings on front and rear of the impeller for easy and cost-effective maintenance and continued high efficiency
- Shaft material - carbon steel
- Cooling fins on the bearing frame to remove heat from the oil - extended bearing life
- Magnetic filter in drain plug - no fines in the oil
- Impellers in cast iron or bronze
- All impellers are investment cast for optimal efficiency
- Patented "Twiner System" for easy gland servicing.

## Benefits

- New neck rings allow for quick and cost-effective maintenance and restores original efficiency
- Investment cast impellers give a seamless and ultra-smooth surface which reduces friction and increases efficiency.

General data			50Hz / 60Hz	
	Nominal outlet	Capacity max. [m³/h]	Head max. [m]	Power max. [kW]
SK50	DN40 - PN16/25	35	150	20
SK65	DN50 - PN16/25	60	195	45
SK80	DN65 - PN16	95	195	60
SK100	DN80 - PN16/25	155	185	90
SK125	DN100 - PN16	240	200	120
SK150	DN125 - PN16	300	165	130

Materials of construction		
Parts Description	Standard Material	Optional Material
Diffuser	Cast iron	
Shaft	Mild steel	Stainless steel
Impeller	Cast iron	Bronze
Neck rings (front & rear)	GG25 cast iron	Bronze
Shaft sealing	Graphite gland packing	Mechanical seal
Bearings	Oil bath	
Volute	GG25 cast iron
