HD Range

The Mono HD range of horizontal pumps has been developed over the years for a wide variety of high pressure water transfer duties. These include irrigation, stock watering, domestic water supply and slurry pump gland servicing. Simplicity of design makes these pumps easy to service. Being of modular construction there is a high degree of inter-changeability of components.

Features

- Steady, non-pulsating flow
- Positive displacement pumping principle
- Abrasion-resistant pumping element comprising a resilient rubber stator and a hard chrome-plated rotor
- Inherently self-priming
- Versatility - Mono HD pumps can be driven by electric motors, diesel or petrol engines, and tractor PTOs.

Capacities

- Flows up to 70m³/hr
- Heads up to 450m

Application

- Irrigation
- Stock watering
- Domestic water supply
- Slurry pump gland service
