PP Range

Typical Performance Guide

The Orbit power pump is the largest range of helical rotor, horizontal power pumps available for high flow and high head water transfer duties and similar applications. These abrasion-resistant products offer constant, non-pulsating flow and are highly efficient over a broad range of heads and speeds for reduced fuel and/or electricity consumption.

Features

- Pressure head developed is independent of pump speed
- Flow is proportional to speed
- High developed head for irrigation
- Suitable for drive by electric motor (AC/DC/solar), petrol engine, diesel engine or tractor PTO
- Serviceable on site by unskilled labour
- Stainless steel flexible shaft.

Capacities

- Flows up to 70m³/hr
- Heads up to 450m

Application

- Stock watering
- Spray irrigation
- Domestic water supply
- Water extraction from saturated river beds
- High capacity flow water transfer
